Summary

Frontend Developer and BS IT graduate specializing in React, TypeScript, JavaScript, and Tailwind CSS. Founder of Intellara AI, a SaaS platform featuring AI-powered web tools. Experienced in building responsive web applications, integrating Gemini and Claude APIs, and developing products from concept to deployment.

Education

Virtual University of Pakistan <i>BS Information Technology</i>	2026
Inspire Group of colleges <i>Information Technology</i>	2021
Muslim Cambridge <i>Matriculation (Computer Science)</i>	2018

Experience

- **Founder & Frontend Developer** – Intellara AI Jan 2026 – Present
 - Built and launched Intellara, a SaaS platform featuring AI-powered tools including a resume builder, cover letter generator, grammar fixer, and PDF converter.
 - Integrated Gemini and Claude APIs into responsive React interfaces.
 - Designed the platform's UI system, product architecture, and roadmap.
 - Developed and shipped each tool as a functional page on the live website.
- **Frontend Developer** – Freelance — Self-Employed Jan 2025 – Present
 - Built React and TypeScript web applications from scratch, including ResumeCraft AI, Fitness Tracker, and Recipe Finder.
 - Used Vite, Tailwind CSS, and Git across projects.
 - Integrated third-party APIs, including Gemini, into working features such as AI-generated resume content.
 - Published project code on GitHub.
- **Frontend Developer** – CodeAlpha Jan 2025 – Apr 2025
 - Built StreamVault, a Netflix-style streaming platform in React with responsive layouts and easy content browsing.
 - Developed an image gallery using React, JavaScript, and CSS with a clean, responsive grid layout.
 - Applied React, JavaScript, HTML, CSS, and Git during the frontend internship program.

Projects

Intellara AI <i>React, TypeScript, Tailwind CSS, Gemini API, Claude API</i>	2026
– Built and launched a SaaS platform with AI-powered tools including a resume builder, cover letter generator, grammar fixer, and PDF converter. – Designed the product UI system and integrated Gemini and Claude APIs into responsive React interfaces.	
ResumeCraft AI <i>React, TypeScript, Vite, Gemini API</i>	2025
– Built a freemium AI resume builder using React and TypeScript, integrating the Gemini API for AI-assisted resume content generation.	
StreamVault <i>React, JavaScript, CSS</i>	2025
– Developed a Netflix-style streaming platform with responsive desktop and mobile interfaces focused on content browsing and user experience.	
PureShine Cleaners <i>React, Vite, TypeScript, Tailwind CSS</i>	2025
– Built a complete client website for a cleaning service business, handling the frontend development and responsive user interface.	

- The project was later listed for sale on Flippa.

Fitness Tracker | *React, JavaScript*

2025

- Built a React application for logging and tracking fitness activity with a practical, user-focused interface.

Recipe Finder | *React, JavaScript*

2025

- Developed a React application for searching and browsing recipes with a responsive frontend interface.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3
